

Lab Goal : This lab was designed to teach you more about graphs, mazes, and recursion.

Lab Description : Well, it's time to head home. Wait, what's that? You didn't read the fine print on the terms and conditions, and you signed over your soul? Looks like you're going to have to go get it back. Your soul is located deep in the ninth layer of the convention center the tournament was being held in. Luckily, you know where it is because you're connected to your soul. However, there may be obstacles in the way. Given a map of the building, is it possible to reach your soul?

Input : The first line will contain a single integer n that indicates the number of data sets that follow. Each data set will start with a two integers, x and y , separated by a space, which denote the length and width of the building. The next x lines will contain y characters each, with the following characters:

. - an empty space you can pass through
 # - a wall you cannot pass through
 Y - your starting point
 S - the location of your soul, i.e. your ending point

You can move in any orthogonal direction (up, down, left, right) but not diagonally. The start and end location will always be present on the map.

Output : If it is possible to reach your soul from your starting point, output "Should really be more careful next time...". If it is not possible, output "A wall! My only weakness!".

Example Input File

```
8
5 5
###S.
.....
.####
.#.Y.
...##
5 5
###S.
.....
.####
.#.Y.
...##
1 10
#Y...#...S
10 10
#####S
.....
.#####
.....
#####.
```

Files Needed ::

You must create the java file.

The data file is provided.
 soul.dat

```

.....
.#####
.....
#####.
Y.....
10 10
#####S
#.....
.#####
.....
#####.
.....
.#####
.....
#####.
Y.....
4 4
###.
#Y#.
###.
...S
4 4
###.
#S#.
###.
...Y
10 10
.....
...S.....
.....
.....
.....
.....
.....
.....Y...
.....
.....

```

Example Output to Screen

```

Should really be more careful next time...
A wall! My only weakness!
A wall! My only weakness!
Should really be more careful next time...
A wall! My only weakness!
A wall! My only weakness!
A wall! My only weakness!
Should really be more careful next time...

```
